11:00AM—HISTORIC TOUR-The Kedge

The Kedge, 112 West Street, Bar Harbor, 207-288-3429

The Kedge, originally known as the Veazie Cottage, was built in 1870 by Doane of Boston for one of Maine's wealthiest families and is the oldest surviving summer cottage in Bar Harbor. In the Golden Age that saw the rise of the town to international prominence, it served as the clubhouse for the Mount Desert Reading Room, and in its rooms drank and dined some of the foremost men of the era - names like Vanderbilt, Astor, Morgan and Roosevelt can be found in its journals, along with two tycoons who later went down on the Titanic. Purchased in 1894 by Emily Robeson Price of Philadelphia, sister of President Grant's Secretary of the Navy, it remained in her family for seventy years. Her niece Ethel retained noted architect Fred Savage to apply his magic touches to the house in 1916; it was one of his final residential projects and his work is notable throughout. The house remains essentially a combination of the fine Doane and Savage designs, with very little modernization. The drawing room floor, with its original multi-colored floor, is particularly memorable.

11:00AM—HISTORIC TOUR-The Kedge

The Kedge, 112 West Street, Bar Harbor, 207-288-3429

The Kedge, originally known as the Veazie Cottage, was built in 1870 by Doane of Boston for one of Maine's wealthiest families and is the oldest surviving summer cottage in Bar Harbor. In the Golden Age that saw the rise of the town to international prominence, it served as the clubhouse for the Mount Desert Reading Room, and in its rooms drank and dined some of the foremost men of the era - names like Vanderbilt, Astor, Morgan and Roosevelt can be found in its journals, along with two tycoons who later went down on the Titanic. Purchased in 1894 by Emily Robeson Price of Philadelphia, sister of President Grant's Secretary of the Navy, it remained in her family for seventy years. Her niece Ethel retained noted architect Fred Savage to apply his magic touches to the house in 1916; it was one of his final residential projects and his work is notable throughout. The house remains essentially a combination of the fine Doane and Savage designs, with very little modernization. The drawing room floor, with its original multi-colored floor, is particularly memorable.

OPEN—Wild Gardens of Acadia

Sieur de Monts Nature Center, Route 3, Bar Harbor, Friends of Acadia-207-288-3340
The Wild Gardens of Acadia celebrate their 50th anniversary in 2011. Created and maintained by volunteers, the Gardens offer park visitor an award-winning microcosm of Acadia's uniquely varied plant communities in a serene brookside setting. Glacial effects and a fortuitous location gave Mount Desert Island a broad range of ecosystems—from subalpine to peat bog to saltwater—within a very small area. In addition, a number of plant species reach the northern or southern limit of their range within Acadia National Park. The Wild Gardens of Acadia include over 400 plant species, all indigenous, in twelve sections such as mountain, heath, and seaside, designed to represent natural habitats found within Acadia National Park. Volunteer docents and informational brochures are available to help visitors discover the Gardens.
